COMPANY PROFILE

ABOUT US

Established in 1988 by Mr. R. K. Agarwal, our company has proudly evolved into a leading name in the packaging industry. As a professionally managed family business, we prioritize quality and innovation in every product we offer. Under the banner of Yashovardhan Udyog, we specialize in delivering high-quality packaging solutions that meet the diverse needs of our clients.

Located in Pune, India's one of the most developed industrial state, we benefit from strategic manufacturing facilities in Bhosari and Chakan. Our state-of-the-art multilayer blown film plant allows us to produce a wide range of packaging products, including plastic bags, films, stretch films, shrink films, and VCI films. This enables us to cater to a variety of industries, ensuring that our clients receive the best possible solutions tailored to their specific requirements.

WHY CHOOSE US?

01

QUALITY

An ISO certified company with strict adherence to global quality standards. Excellence in manufacturing is based on quality raw materials, equipment and its quality policy.

02

EXPERTISE

With more than 40 years of experience in plastic industry and diverse team comprised of experts in polymer technology we provide the right packaging solutions to our customers.

03

ADVANCED MACHINERY

Our advanced manufacturing facilities are equipped with modern machinery and technologies to produce poly films & bags with precision and consistency.

Shrink Film

LDPE Shrink Film is a flexible, durable packaging material that shrinks tightly around products when heated, creating a secure, tamper-evident seal. It offers excellent protection, maintaining product integrity during transportation and storage. Available in transparent and milky white colors, it is suitable for a wide range of applications.

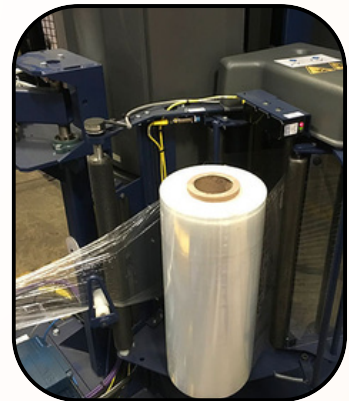

Mulch Film

Our Mulch Film is a high-quality agricultural covering designed to enhance soil health and promote plant growth. Made from durable polyethylene, this film helps retain moisture, suppress weeds, and regulate soil temperature. Its UV-resistant properties ensure long-lasting performance in various weather conditions.

Machine Grade Stretch Film

Our Machine Grade Stretch Film is designed for high-efficiency automated wrapping, providing superior load stability & high tear resistance. Engineered for use with stretch wrapping machines, it offers exceptional stretchability (up to 300%), reducing material usage while ensuring secure, damage-free transport and storage of products.

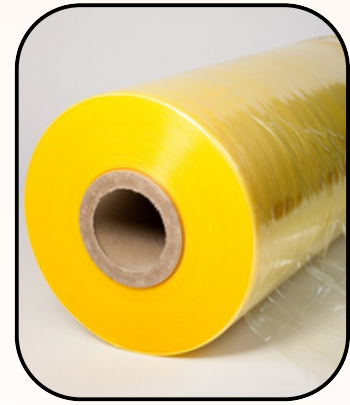

Hand Grade Stretch Film

Our PE Stretch Film is a high-quality, flexible wrapping solution designed for secure packaging and palletizing. Made from linear low-density polyethylene, it offers excellent stretchability, allowing it to conform tightly to various shapes and sizes. This stretch film provides reliable load stability, protection against dust and moisture, and is easy to apply.

VCI Stretch Film

Our exclusive product, VCI Stretch Film offers effective corrosion protection for metal items during storage and transit by preventing rust due to oxidation. Its strong stretch capabilities ensure secure packaging while safeguarding your products. This film provides reliable load stability, protection against dust, rust and moisture, and is easy to apply.

VCI Film & Bag

Our VCI Film (Volatile Corrosion Inhibitor Film) is an innovative packaging solution designed to protect metal surfaces from corrosion during storage and transit. Infused with corrosion-inhibiting chemicals, this film creates a protective barrier that prevents rust and oxidation without the need for oils or greases.

Dyna Film / LDPE Tarpaulin

Dyna Film or LDPE Tarpaulin is a robust and versatile polyethylene-based material designed for heavy-duty applications. This high-performance film provides exceptional strength, tear resistance, and weather protection, making it ideal for a variety of industrial and commercial uses.

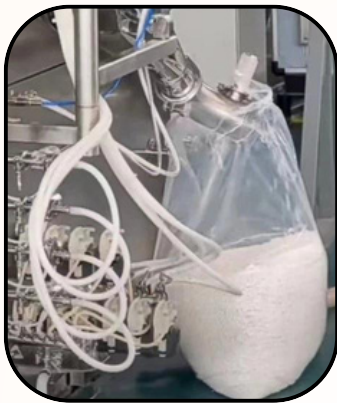

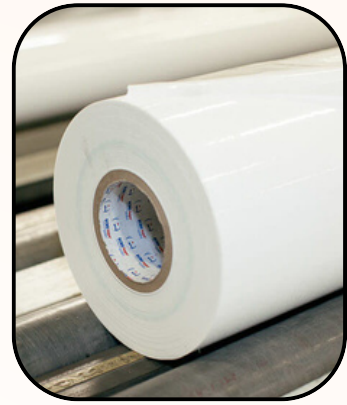

Polyethylene Film, Bag & Cover

Made from 100% virgin, our Polyethylene Film and Bags offer a versatile, cost-effective solution for packaging, storage, and transportation needs. Made from high-quality raw material, these films and bags provide excellent strength, durability, and moisture resistance, making them ideal for a wide range of industries including retail and logistics.

Surface Protection Film

Surface Protection Film is a high-performance, self-adhesive film designed to safeguard surfaces during manufacturing, transportation, and installation. It provides an effective, temporary layer that shields against scratches, dust, dirt, and other potential damage, ensuring that your products maintain their pristine condition.

Pharma & Food Bag (Anti-Static)

We manufacture bags for pharmaceutical and food packaging industries, which require strict adherence to exact specifications and the highest quality. All of our bags are manufactured with 100% prime virgin raw material using good manufacturing practices. These bags allow seamless transfer of material & help prevent loss of material stuck to poly bag due to static charges.

Colored Polyethylene Film

Made from 100% virgin, industry-leading raw materials and technology, this colored PE film guarantees superior quality and consistency in sealing strength, surface smoothness, clarity, and printability, enhancing the aesthetics and presentation of your product packaging.

Air Bubble Film

Air Bubble offers reliable protection for fragile items during shipping and storage. Made from high-quality polyethylene, this bubble wrap is lightweight, durable, and designed to absorb shocks, reduce vibration, and prevent scratches.

Cling Film

Cling Film is a robust, high-performance wrap designed for commercial and industrial applications. Made from durable PVC or polyethylene, it offers superior stretchability, excellent cling, and reliable moisture resistance. Available in various widths and thicknesses to meet the specific needs of different industries

PP & PET Strap

Strong and durable strap used to securely fasten and transport boxes safely. Offers high tensile strength and superior load-bearing capacity, ideal for securing heavy goods during transport.

PP & HDPE Woven Fabric

Our PP / HDPE woven rolls come in both laminated and non-laminated options, providing versatility and flexibility for various packaging needs. Made using high-quality granules our rolls are appreciated for their high load-bearing strength, moisture resistance, and lightweight nature.

BOPP Tape

Strong and durable BOPP tape, available in brown and transparent colors, ideal for sealing and securing packages.
